

Dear Florida Lawmakers,

This weekend Florida will celebrate mothers for all that we do for our families and others. No need for flowers, cards, gifts, or applause, this year all we ask: please consider our cause.

Protecting our children is no easy mission, which is why all us moms want to end prohibition.

Let's legalize cannabis, adopt regulations, and join in the progress that's sweeping the nation.

End needless arrests, which create records that last, and repair the damage they caused in the past. Take sales off the street, where they may lead to violence, and put them in stores that are specially licensed.

Every poll on this plan finds our state's full of takers, yet backing's still lacking among many lawmakers.

We know you share our goal of preventing harm and also that bold change can trigger alarm.

But decades of forcing this plant underground has proven unpopular, unsafe, and unsound.

A legalized market for adults will have perks, and experience shows us regulation works.

We learned this when we repealed booze prohibition and now see it in states with the laws we envision.

Please check out our website, become a supporter, and work with us toward a safer, more equitable Florida.

Sincerely,

WISE Florida
